Company Profile

ROKADE RotoTechniks undertake In House Dynamic Balancing Services & totally devoted to provide full time services for Balancing activities such as Vibration Monitoring, Measurement & Analysis, Noise Measurement & Consultancy all over India.

ROKADE RotoTechniks are also Business Associates of SCHENCK RoTec (I) Ltd, Corporate Office at SCHENCK India, Noida. Schenck is the leading manufacturer and supplier of the Dynamic Balancing machines/ instruments in India.

For 15 years we had been rendering same services in the name of Perfect Balancing Centre. The journey of 15 years in these services has been quite exciting. From humble beginnings when we started our Balancing activities in a small workshop fifteen years ago, we have expanded our Balancing services all over India.

In order to meet increasing market needs in efficient and disciplined manner, we have formed above separate Company.

Our Office & factory is located at Rabale, Navi Mumbai.

We have well equipped with advanced sophisticated machinery and equipment to ensure good quality. Our dedicated employees contribute greatly to the Company's success. Their teamwork & expertise effectively enhance our customers' confidence & support.

Inhouse Balancing Services

ROKADE RotoTechniks offer a complete range of Balancing Services for Rotors weighing up to 100 Tons.

We have various Balancing Machines installed at our Works for any type of Rotors weighing up to 15 Tones and we are using the latest Technology from SCHENCK RoTec to precision, reliable and cost effective solution for Balancing of your jobs.

Additionally we have resources & facility for Balancing your jobs at your factory site anywhere in India by Transportable (Mobile) Hard Bearing Balancing m/c (model HT 100 of SCHENCK) for rotor weighting upto 100 Tons.

Vibration Analysis

A Machine too has feelings, listen to it's voice and it will listen to you. Machine does not break down without warning. It depends on whether you were listening to their story.

We offer a complete range of services to diagnose, troubleshoot and correct machine condition regularly as well as annual maintenance contract (AMC) basis.

Vibration Analysis can be the most valuable tool for predictive and preventive maintenance which will determine the healthy condition of the machine.

Overall vibration measurement in accordance with IS 11724, ISO 2372, BS 4675 or VDE 2056 Standard Specifications.

Field Balancing

Field Balancing of all types of rotating machineries using latest portable instruments.

On site balancing provides a practically efficient method for test facilities, assembly and plant maintenance to balanced completely rotor assembly in position avoiding disassembly of your equipment, cost of transport, labour and down time.

We have experienced engineers who conduct such services regularly all over India for various applications such as :

- ID / FD Fans
- Centrifugal Basket assembly
- Cooling Tower Fan assembly
- Turbine Alternators
- Fibrizor Rotor assembly
- Textiles Mill high speed bobbins & spindles
- CNC Machine tool holders/boring bars

Rotor Repairing & Services

Every Fan, Blower or other Rotary Elements which is repaired & rebuilt by ROKADE RotoTechniks is precision balanced to assure smoothly quiet operations and maximum bearing life in extended services.

- Complete Fabrication on Repair & Damage Fans, Blowers.
- Mechanical Repair, Rebuilt Hard facing, Stellite Welding and Machining of other equipment components.
- We undertake special assignments as repairing construction machinery, building up Shafts for re-machining and reconstructing damaged weldments.

Sectors served by us:
